“The Latest on Orphan Genes and What They Mean for Darwin’s Tree of Life”

Dr. Paul Nelson

The hypothesis of our common descent via the Last Universal Common Ancestor is examined. New revelations about the genetic code and data mining for homology leave the evolutionary paradigm of origins with many unanswerable questions. The data supports intelligent design and a loving intelligent designer who created human beings after His own image.

September 11th

**St. Mark Education Center
1840 E. Grand Ave. Lindenhurst, IL**

No charge—donations accepted

6:00 pm - doors open

6:45 pm - coffee & light refreshments

7:00 pm - speaker

8:00 pm - Q&A
