Starlight, Time and God's Big Magnets

**Dr. Russell
Humphreys**

Almost every large body in our Solar System has, or once had, a strong magnetic field. On the basis of Scripture in 1984 his proposed theory suggested how God created those fields. His five very specific predictions about what then-future space probes would find out about planetary magnetic fields has now been verified, several in the last few years. They could have come true only if the Solar System is young, only thousands of years old.

July 10th

St. Mark Education Center
1840 E. Grand Ave. Lindenhurst, IL

No charge—donations accepted

6:00 pm - doors open

6:45 pm - coffee & light refreshments

7:00 pm - speaker

8:00 pm - Q&A
