About Midwest Creation Fellowship:  
[www.midwestcreationfellowship.org](http://www.midwestcreationfellowship.org)

Dinosaurs have captured the public's imagination since they were first recognized as distinct creatures in the mid-1800s. But since then, ideas have changed A LOT about how we view dinosaurs. Some scientists say all birds are dinosaurs with feathers, and it can get confusing.

Creation Paleontologist, Dr. Marcus Ross, will walk us through the evidence and inference, towards a creationist view of dinosaurs and birds.
