Thermodynamics Confirms Creation

Many Christians wonder if the Second Law of Thermodynamics resulted from God's Curse on His perfect Creation due to Adam's sin.

Spike will explain in an uncomplicated way what the Laws of Thermodynamics are, what entropy is, (often misunderstood), and how they are not from the Curse.

Instead, these principles confirm that the Universe and life on Earth require a supernatural, intelligent Creator/Designer, and that the age of the Earth and Solar System is only thousands of years.
